

Announcing New Formulation Ardex Tile Adhesives

A new generation of higher yield tile adhesives with added application benefits that cost you less!

Ardu-Flex 5001 and Ardu-Flex 6001 are two new names to remember, replacing the old Ardu-Flex 5000 grey and Ardu-Flex 6000 formulations.

Advanced adhesive technology means Ardu-Flex 5001 is smoother, easier to apply and offers major cost savings with an increased yield of up to 11% per bag. Built-in admix, flexibility and the ability to fix all types of tiles including fully vitrified and porcelain makes Ardu-Flex 5001 a versatile and economical choice.

Ardu-Flex 6001 flexible tile adhesive now reduces grout and walk on time from 3 hours to an incredible 1½ hours, giving you a new competitive edge in fast track applications demanding minimal downtime. New Ardu-Flex 6001 is also smoother, easier to apply and offers a reduced cost plus increased yield per bag.

Ardu-Flex 5001 and Ardu-Flex 6001 are further evidence of Ardex UK's commitment to providing the tiling industry with high performance products that consistently exceed expectations.
