

HIGH PERFORMANCE
TILING AND FLOORING PRODUCTS

Environmental Policy Statement

As a leading manufacturer and supplier of high quality cementitious, aqueous and resin based construction products; ARDEX UK Limited is committed to operating a fully integrated environmental policy, aimed at providing our customers with both high quality products and services in a manner that does not impact upon, but enhances, the environment.

Through the implementation of our environmental management system, we will address the environment impacts of our operations, identifying any significant impacts, set clear targets and objectives, which we will utilize to manage our environmental performance and legislative compliance.

The company will regularly review these targets and objectives to drive the cycle of continual improvement forward.

The company will communicate on aspects of its environmental performance and programme of improvements to all employees, suppliers and customers, engaging any concerns or interests they express.

ARDEX UK Limited will demonstrate its commitment to the environment, through this programme of continual improvement to:

- Ensure the company meets, or exceeds, all current and relevant legislative requirements, Codes of Practice, etc., regarding our business operations.
- Ensure the company's operations and products support the principles of pollution prevention in order to minimise any adverse environmental impacts.
- Ensuring our management and employees are fully aware and accept their responsibilities, both collectively and as individuals, for environmental impacts. Through the implementation and use of induction and continuous training programme, awareness of these issues will be promoted.
- Take account of environmental impact of new product development at the design stage, optimising efficient use of raw materials and non-renewable resources.
- Optimise the life cycles of the products to minimise environmental impact of raw materials, product usage and eventual disposal.
- Promote and improve energy efficiency across all processes and operations, minimise waste, reduce, re-use and recycle wherever practical, the resources consumed by our business.

To ensure our environmental performance and legislative compliance are implemented, this policy will be regularly monitored and updated as necessary.

Peter Bell
