NEW ARDEX DPM

The total Fast Track DPM/Smoothing System from ARDEX

Specifically designed to slot in perfectly with all ARDEX latex and water-based levelling compounds the all new ARDEX DPM is a solvent free, low viscosity, two component system.

ARDEX DPM is a sophisticated surface damp proof membrane with high inherent strength and superb bonding properties to appropriate substrates including very damp concrete and screeds. Easily applied as a two coat system new ARDEX DPM allows the early laying of floorcoverings, making the total ARDEX DPM/Smoothing System ideal for all fast track building programmes.
